INTRODUCTION

Wisman's MCD series of high voltage 1~5W micro-modules that provide output voltages ranging from 0.3kV to 3kV. MDC modules are compact six-sided shielded modules with ultra-low noise 10ppm, high stability 10ppm/hr and ultra-low temperature coefficient 10ppm/°C. All models are provided with external potentiometer or an external voltage monitoring panel. This series modules have protection functions including over current protection, arc fault protection and short circuit protection.

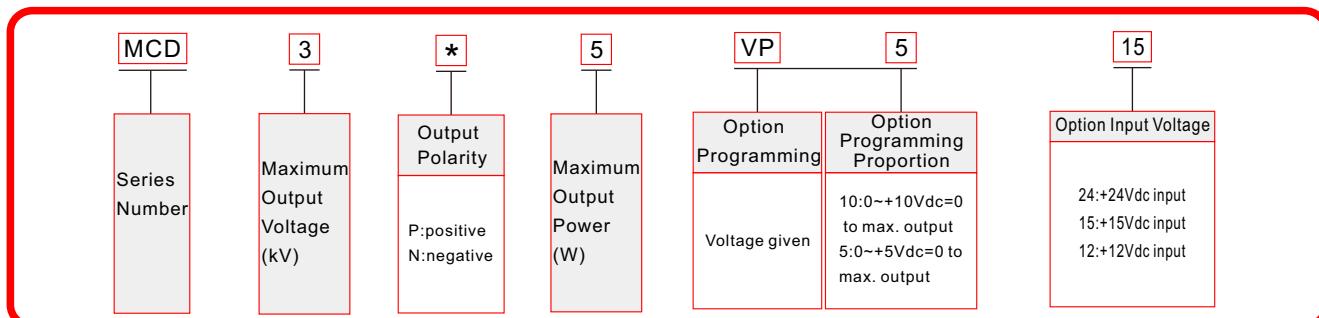

TYPICAL APPLICATIONS

Mass spectrometry photomultiplier tubes (PMT), solid state detectors, Piezo crystal devices, ultrasonic transducers, microchannel plates (MCP), spectroscopy, scintillation counters, electron multiplier detectors, nuclear Instruments, electrophoresis, semiconductor testing, DNA sequencing, radiation counter, electron and ion beams, electrostatic chuck, high voltage, bias hipot testing, precision lenses, image intensifiers, semiconductor testing, chemical applications, laboratory applications, industrial application supplies.
