INTRODUCTION

Wis man's PMC is a six-sided shielded modular high-voltage power supply, adopting proprietary linear power conversion technology, with small size, higher efficiency and lower ripple. The standard configuration of the PMC series voltage programming given signal uses differential input form, which greatly improves the anti-interference ability to external noise. Wis man's PMC series power supply can be measured and controlled internally, externally, and computer. RS-232 and RS-485 interfaces are optional. This series of modules are fully protected by overcurrent, arcing, short circuit, etc.

TYPICAL APPLICATIONS

Mass spectrometry, Photomultiplier Tubes, Solid state detectors, Piezoelectric crystal devices, Voltage bias, Ultrasonic transducers, Microchannel plates, Spectra, Scintillation counters, Electron multiplier detectors, Nuclear Instrument, Electrophoresis, DNA sequencing, Counter, Electron beam, Ion beam, Electrostatic chuck, Withstand voltage test, Pulse power supply, Precision lens, Image intensifiers, Semiconductor testing, Capacitor charging, Electrostatic spinning, Electrostatic discharge testing ESD, Life sciences, Medical chemicals, Scientific experiments, Industrial applications.
